<b>Contact Name</b>	Shannon O'Neill
<b>Telephone Number</b>	+44 (0)1235 567999
<b>Email Address</b>	Shannon.oneill@sa.catapult.org.uk

Department/Unit	Specific services offered
<b>Business support</b>	<p>The Satellite Applications Catapult is a unique technology and innovation company, boosting UK productivity by helping organisations harness the power of satellite-based services. We are driven by how our actions help the organisations we work with, both large and small, bring new services to market to ensure that they can scale and bring greater revenue generation and job creation.</p> <p>We support businesses of all sizes and maturity through a range of enabling services, offering high value facilities and a combination of deep technical alongside business expertise aimed at lowering the barriers to innovation and growth. As part of our support offering, the Satellite Applications Catapult delivers tailored business design sprints aimed at various segments of the space and non-space ecosystem.</p> <p>Sprints are a one or two-day workshop that guide companies who are at an inflection point. Sprint sessions typically involve a business strategist, technical specialist and user centred designer working with the company to deliver an agreed set of deliverables (e.g. investor deck, commercialisation roadmap, user requirements/stories, service blueprints. etc.).</p> <p>Other business support offerings which can be deployed independently or together as befits the business include:</p> <ul style="list-style-type: none"> <li>• Business modelling, market research and financial planning, road-mapping business and/or product or service goals</li> <li>• User-centred design</li> <li>• Start-up support</li> <li>• Innovation and growth services and rapid commercialisation</li> <li>• Scale up support</li> </ul>

<b>Technical facilities</b>	<p>We offer a unique range of cutting-edge facilities developed to help increase the UK's international competitiveness and provide a platform for accelerating the development of new satellites and applications. Our facilities include:</p> <ul style="list-style-type: none"><li>• Disruptive Innovation for Space Centre (DISC), a rapid prototyping facility helping companies accelerate the development of new satellite products and services</li><li>• A 5G step out centre, providing facilities to help define the next generation of terrestrial and satellite 5G infrastructure</li><li>• An incubation centre at the Westcott Business Park for companies involved in launch, 5G or drone usage</li><li>• Satellite testing facilities including near- and far-field ranges and communications lab</li><li>• Data access and storage facilities including CEMS, SEDAS and the Data Discovery Hub</li><li>• A ground segment facility at Goonhilly in Cornwall</li></ul>
