

Invest NI Supported Business Performance (2017)

Key Performance Indicators (KPIs) are collected from a sub-set of Invest NI businesses who are significant contributors to the NI economy. KPIs are geographically assigned based on the HQ location of the business.

Key metrics include all sales, external sales outside NI, export sales outside UK and employment (based on Full-Time Equivalent). All data is provisional and subject to further revision.

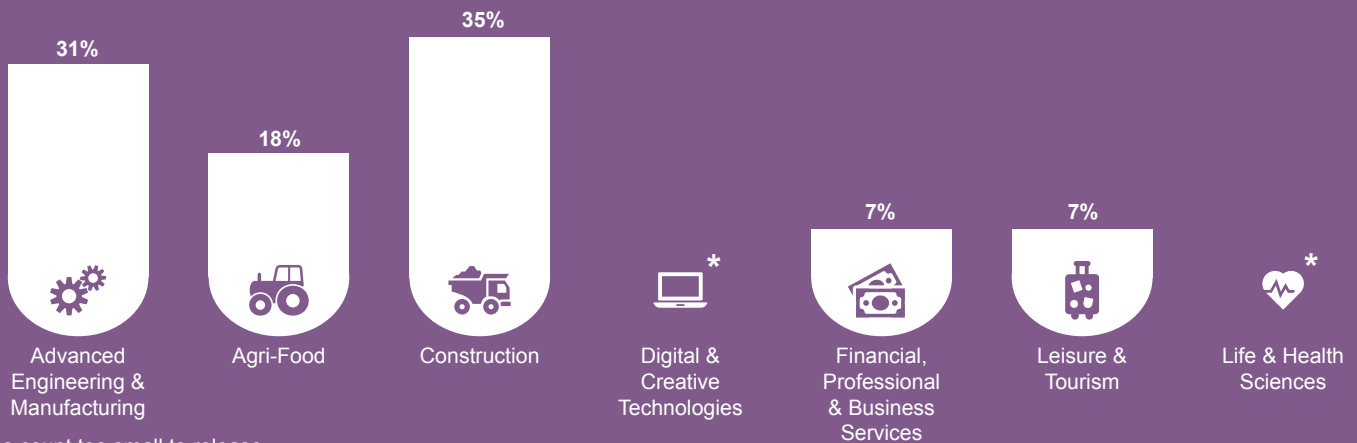

Businesses are classified according to Invest NI's sector reporting structure which is based on their main product and/or service within Northern Ireland.

* Sales change is based on those businesses for which we have data in each of the years of analysis.

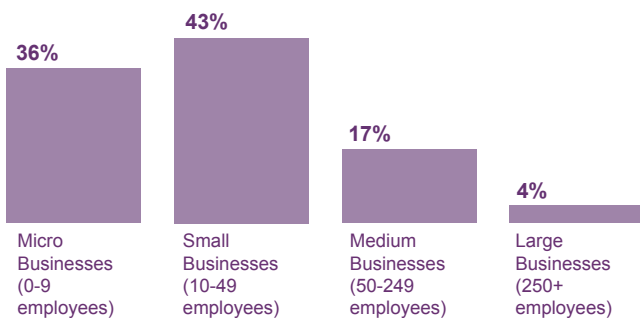

Of the 10,970 additional jobs created between 2016-2017, 527 of these were in this council area.

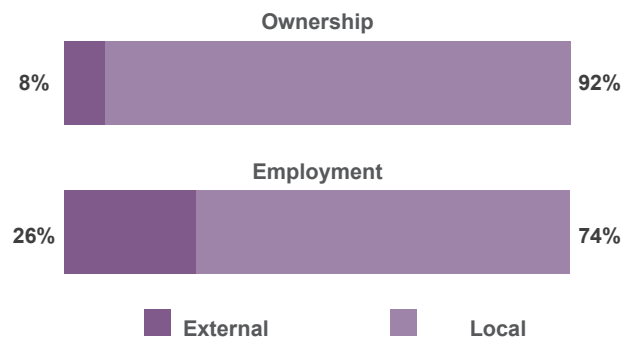

Employment by Sector

Businesses by Size

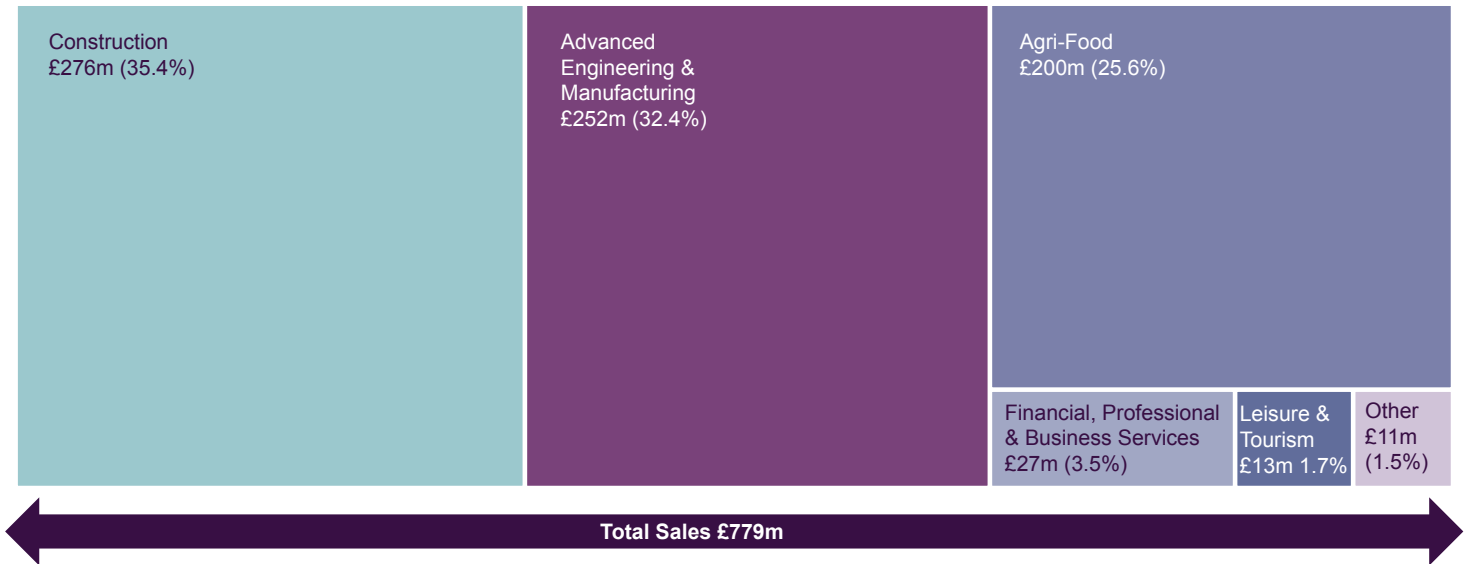

Business by Ownership

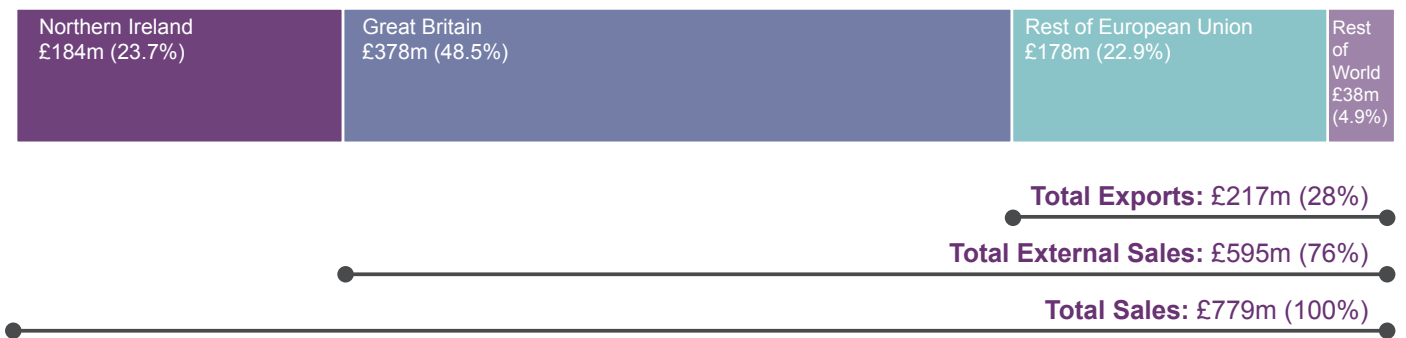

Whilst externally-owned businesses represent 8% of the total they account for 26% of employment.

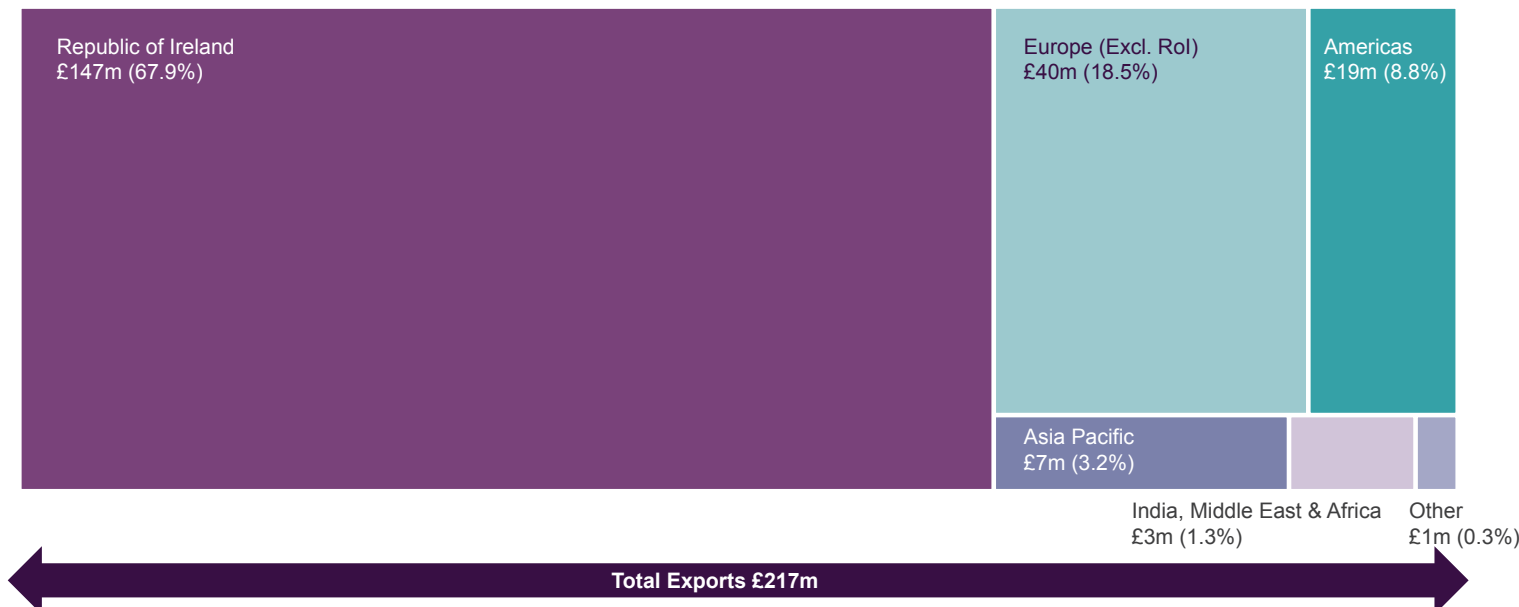

Sales by Sector

Sales by Destination

Sales by Trade Territory

Labour Market Structure (2016)

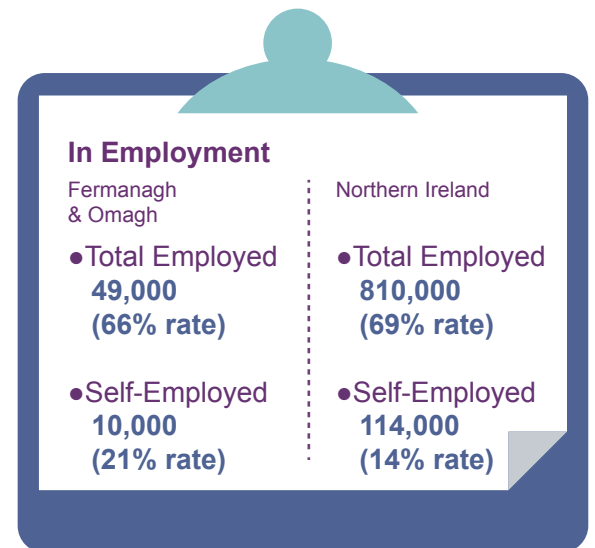

Fermanagh & Omagh

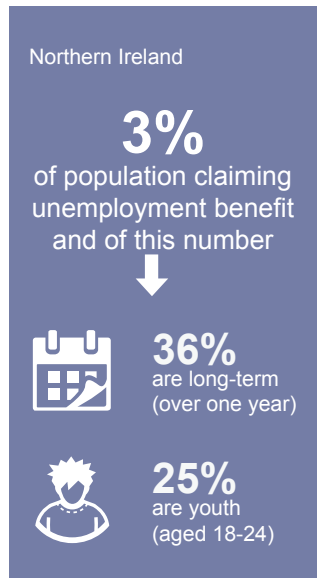

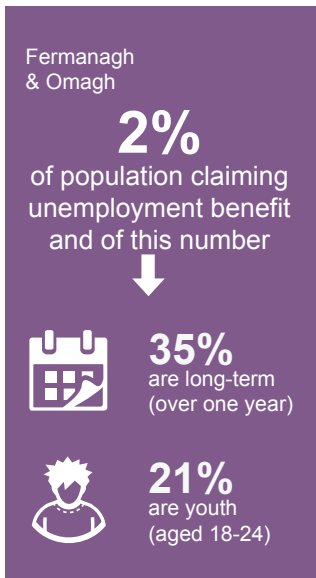

Northern Ireland

Source: Labour Force Survey, NISRA

Unemployment Claimants

Source: Claimant Count, NISRA

The labour market structure is composed of the economically active (people in employment and seeking work) and inactive (not seeking nor available for work). This data is provided through the Labour Force Survey (LFS), the largest regular household sample survey in Northern Ireland. **Total numbers in employment do not equate to total jobs as a person can have more than one job.**

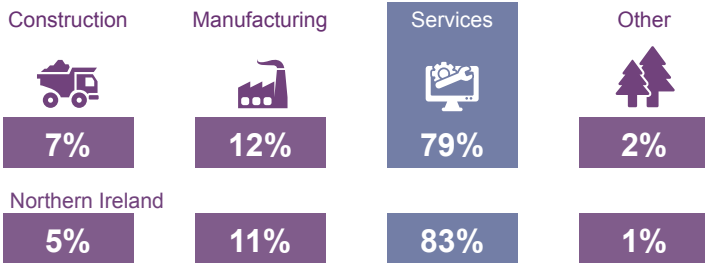

Unemployment annual averages data is derived from the Claimant Count as LFS figures fall below suppression thresholds. This is an administrative data source based on the numbers claiming unemployment-related benefits. It uses a different definition of unemployment to the LFS.

Both measures of the labour market are based on the working-age (16-64) population.

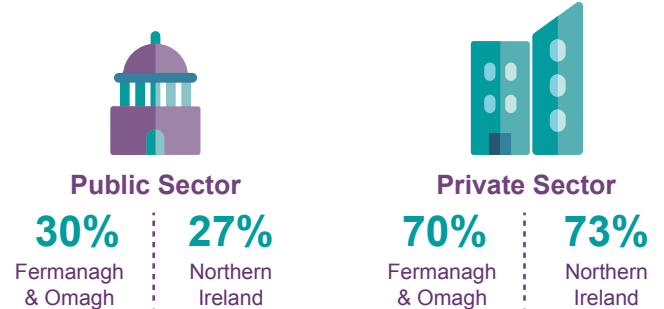

Employee Jobs (2016)

39,837 jobs within the region (5% of the Northern Ireland total)

Industry Sector

Public/Private Sector

The Business Register and Employment Survey is a business census which provides employee jobs estimates. **This is based on the location and number of jobs rather than the number of persons with a job; therefore someone with two jobs will be counted twice.** It excludes agriculture employee jobs and self-employed (not on a PAYE system).

Source: Business Register and Employment Survey, NISRA

Earnings (2017)

The median annual earnings for Northern Ireland are **£21,159**

Place of Residence

Median annual earnings based on people living in the area -

£20,280

Place of Work

Median annual earnings based on people working in the area -

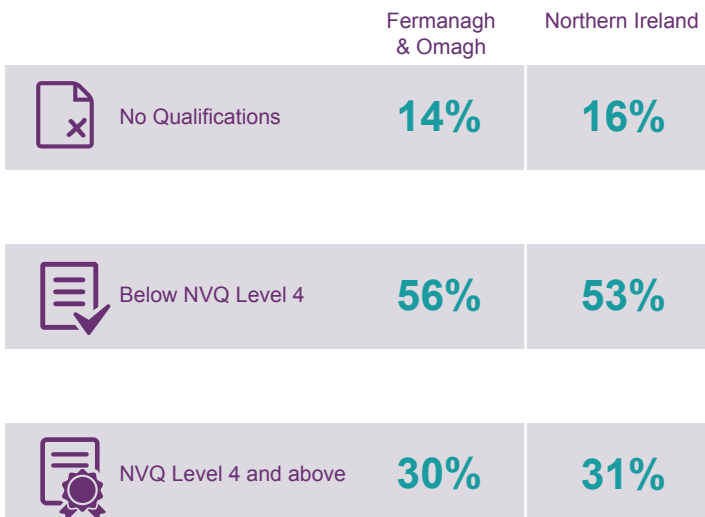

£19,141

Based on median, annual, basic and other earnings for full-time employees (more than 30 hours per week) in the private sector.

Source: Annual Survey of Hours and Earnings, NISRA

Qualifications (2016)

This data is provided through the Labour Force Survey (LFS) which is a household survey and includes a measure of qualifications, based on the working-age population (16-64), using the following classification:

- No Qualifications
- Below NVQ Level 4 (Level 1 to Level 3)
- NVQ Level 4 and above (degree level and above)

Source: Labour Force Survey, NISRA

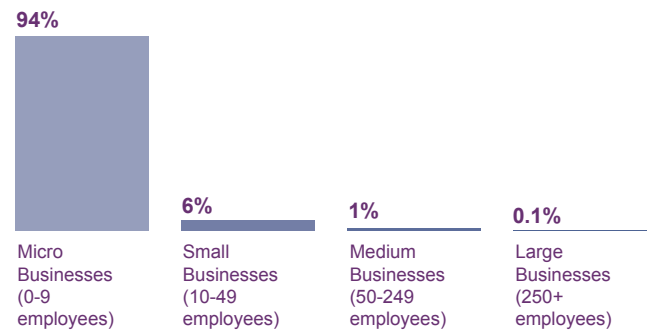

Business Base (2017)

The business population is defined here by the Inter Departmental Business Register which excludes smaller businesses and the self-employed who fall below the VAT registered/PAYE thresholds.

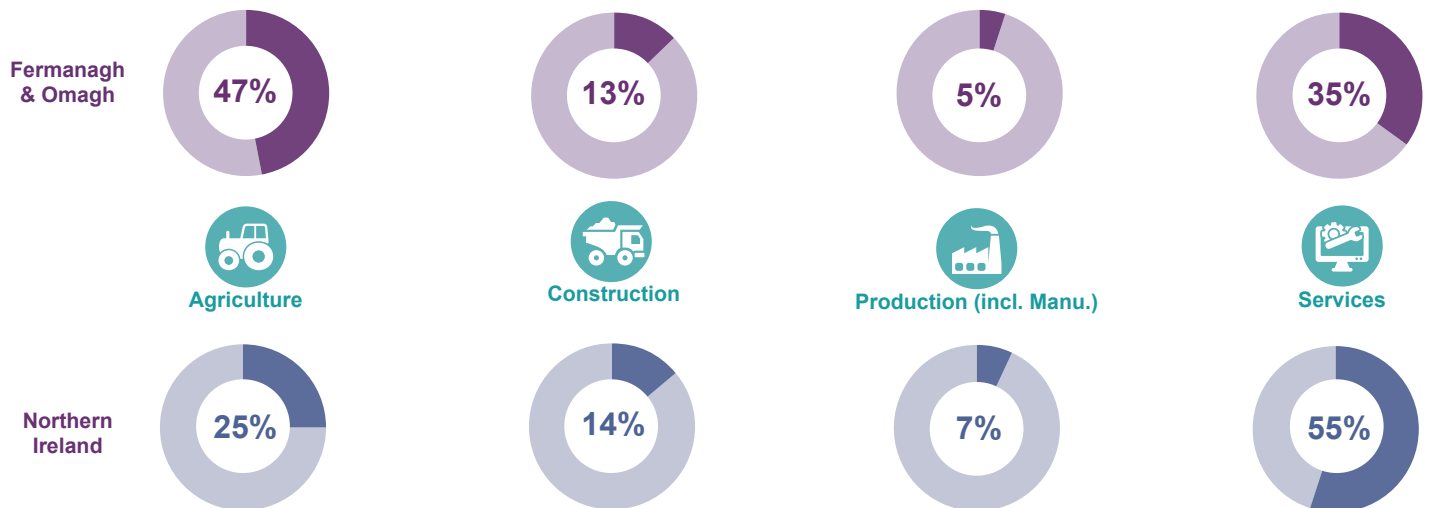

Number of Registered Businesses

Businesses by Size

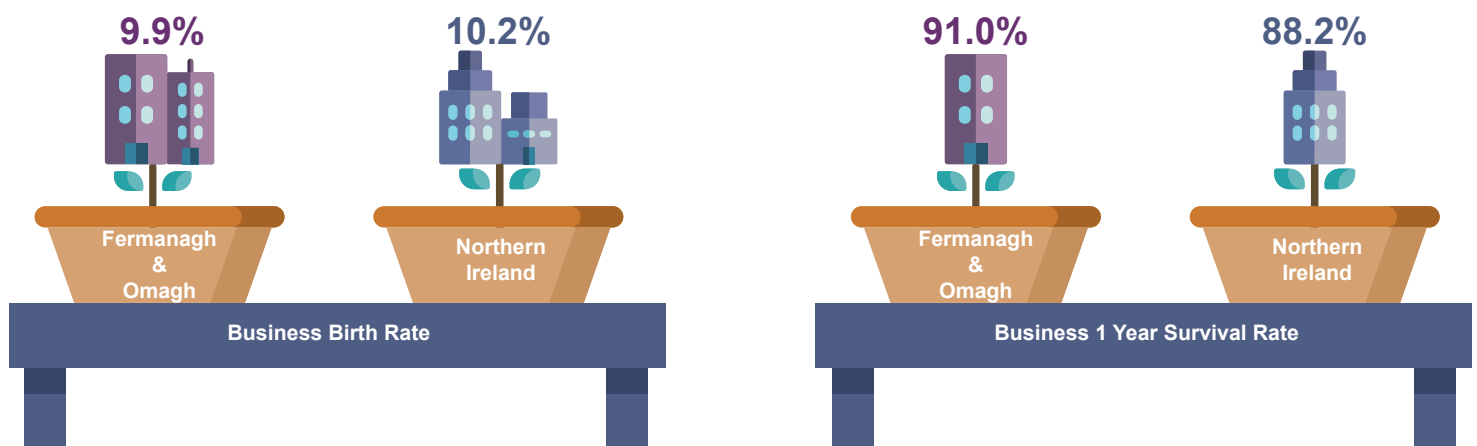

Businesses by Sector

Business Demography (2016)

A business birth is identified as a business who was present in the active business population dataset for 2016, but not in the two previous years. A business is deemed to have survived for one year if having been a birth in 2015, it is active in terms of employment and/or turnover in any part of 2016. Rates are expressed as a percentage of total active businesses.

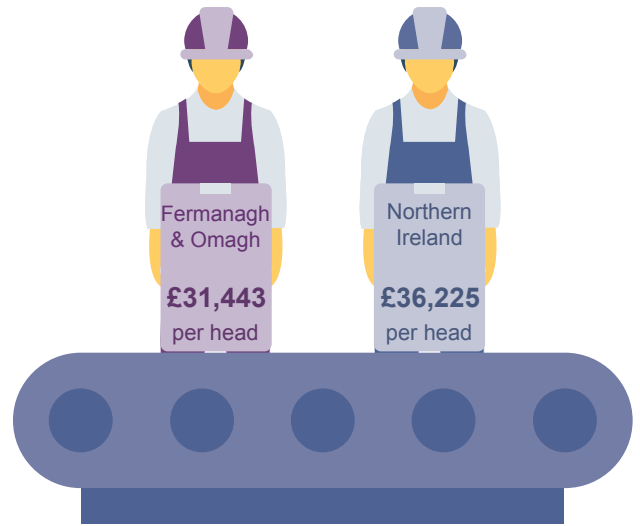

Source: Inter Departmental Business Register, ONS

Productivity Work-Place Based (2015)

Productivity is based on the approximate Gross Value Added (aGVA) generated by the non-financial business economy (and excludes public sector). This is measured by the Northern Ireland Annual Business Inquiry based on income, less cost of goods and services used to create this income.

Per head calculations are made using total in employment, rather than the resident population as this can be subject to distortion (due to the effects of commuting and variations in age distribution).

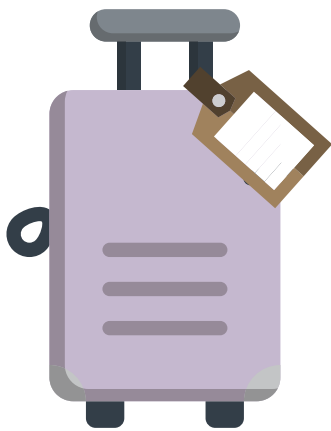

Source: Northern Ireland Annual Business Inquiry, NISRA

Tourism (2017)

A variety of statistics are used to provide a picture of tourism. These include: passenger and household surveys which measure the number of overnight trips and associated expenditure; occupancy surveys of local hotels and commercial accommodation and the Visitor Attraction Survey.
