

**Northern
Ireland**

Northern Ireland

A centre of excellence for FinTech

Overview

An unbeatable combination of world-class talent, highly competitive operating costs, research excellence and a resilient infrastructure, in a low-risk, pro-business environment, has fuelled the growth of Northern Ireland's financial services sector.

As financial firms and solutions providers seek technology, talent and industry expertise to harness next generation development, Northern Ireland has become a leading global location for FinTech investments.

Global names such as Citi, Allstate, Liberty Mutual and First Derivatives have established and expanded their operations here, while more recent investors CME Group, Vela and TP ICAP have joined the cluster and established delivery centres of significant scale in Northern Ireland.

The growth of data and computing power, digital and mobile technologies, analytics and automation are driving transformation in the industry, while cybersecurity and emerging technologies such as blockchain, machine learning and AI are developing rapidly. Capability across these areas is well established in Northern Ireland, which has long held an international reputation for engineering excellence.

International firms have not only benefitted from the strength of technology and innovation talent in the region, they have tapped into a wealth of other skills available to deliver in a broad range of areas including fund administration, client services, investment operations, analytics, risk management, regulatory compliance and legal services.

Northern Ireland's start-up and SME tech community is also thriving thanks to a highly developed entrepreneurial ecosystem, vibrant networking scene and the active promotion of sector collaboration.

Northern Ireland enjoys a unique position within the UK and Europe. As part of the UK, Northern Ireland operates within its globally respected and robust regulatory framework. At the same time being located on the island of Ireland has also allowed Northern Ireland access to the European and Irish Financial Services markets. We also have strong links to the US, through a multitude of US investors as well as high speed internet connection across the Atlantic.

Did you know?

Expertise

There are nearly 40,000 employed in the Financial and related Professional Services sector in NI. **One in four are employed in areas of Fintech** expertise including trading and payments technologies, regtech, insurtech, cybersecurity as well as pioneering activity in disruptive technologies such as AI and data analytics.

Cyber Security

Northern Ireland is **the number one international location** for US cyber security development projects (fDi Markets FT 2020) and home to CSIT - the UK's Innovation & Knowledge Centre (IKC) for cyber security - at Queen's University Belfast.

Connection

Our position on the island of Ireland, also provides us with access to the **UK-EU Fintech Corridor**, connecting Belfast and Dublin. A cross-border partnership, The Fintech Corridor covers the geographical region between Dublin to Belfast. With many well established fintech organisations and enterprise hubs already operating in the region, the area provides start-ups and SMEs with an attractive and accessible location from which to grow across the UK, Ireland and into Europe.

Cities of the Future

Northern Ireland is the **world's top region** for Financial Services technology inward investment projects*. Our capital city, Belfast, has been identified as a **top 3 Fintech location of the future** after London and Singapore** and has been ranked one of the **top 10 European Tech Cities of the future** by the Financial Times, fDi Intelligence.

The Derry and Strabane area has recently been ranked in the **top 5 places in the UK to work from home*****.

* fDi markets FT 2020

** fDi markets FT 2019

***Remote Working Index, uSwitch.com 2020)

Collaboration

Northern Ireland has a **strong collaborative environment**, with companies of various sizes and scale working together to achieve results and grow the sector. The **Fintech NI** network is the independent voice of FinTech in Northern Ireland and made up of active participants in the local ecosystem. It champions and empowers participants in the local FinTech ecosystem to be successful on a national and global stage. It represents Northern Ireland's interests as part of the **UK FinTech National Network**.

Fintech Envoy

We have our own **Fintech Envoy**, directly appointed by HM Treasury. The Envoy is the lead ambassador for Northern Ireland's Fintech sector, promoting it as a place for firms to develop and grow their business as well as showcasing Northern Ireland as a Fintech centre of excellence.

Further & Higher Education

Both **Queen's University Belfast** and **Ulster University** offer renowned degrees in Finance and Accounting and Computer Science and Software Engineering. Both Universities continue to work closely with industry partners to develop Fintech skills for the future.

Northern Ireland's six further education colleges operate across over 40 campuses and work closely with the financial and professional services industry to develop and deliver a range of programmes including apprenticeships, degrees and Assured Skills Academies.

In September 2020 Ulster University welcomed the first cohort of apprentices to its pioneering **Financial Technology Higher Level Apprenticeship degree**, an innovative programme co-created with industry partners to meet the evolving needs of the FinTech sector.

Allstate NI have partnered with the **Letterkenny Institute of Technology** on their Masters programme for **Innovation in Fintech**. This collaboration is continuing to build skills and talent for the North West region.

Banking & Capital Markets Technology

Northern Ireland has developed deep expertise in trading & banking technologies. With leading banks **BNP Paribas, Citi, Danske** and **Lloyds** all having a presence in the province, technologists in NI have developed a range of technology solutions for the banking and capital markets industries.

Over 2,000 software engineers and systems architects are employed in Northern Ireland in the development of trading technology platforms for global capital markets and financial services companies including

CBOE Hanweck, Clarus Technology, Cowen Group, Ion Fidessa, Neueda, Redline Trading Solutions and **Vela Trading Technologies**.

Both Queen's University Belfast and Ulster University in Northern Ireland have trading rooms in collaboration with financial industry partners. These dynamic learning environments enable Northern Ireland students to build skills and capability for the future through engaging with finance and risk challenges under real time trading conditions.

Citi

Citi, the leading global bank, has approximately 200 million customer accounts and does business in more than 160 countries and jurisdictions. Global transactions are supported daily in trillion dollar businesses by Citi Belfast. The Belfast technology team was established in 2005 and develops global applications to support trading and risk management for Citi's equities business, building applications to enable transaction services around the world.

www.citigroup.com
