Northern Ireland Cyber Security
Companies to Watch

Northern Ireland has become a global cyber security hub, boasting an impressive eco-system of specialist university research centres, home-grown innovators and international cyber security leaders.

Northern Ireland firms in the region deliver expertise globally on advanced persistent threats to national security, government, health, automotive, critical infrastructure, capital markets, legal, e-commerce, e-learning and child safety online.

Ampliphae
ampliphae.com
Ampliphae empowers you to get serious about SaaS. Ampliphae SaaSGuard allows an organisation to automate the discovery, assessment and control disciplines needed to support enterprise-scale SaaS adoption, by combining usage analysis, machine learning and AI techniques. Ampliphae SaaSGuard automation allows you to focus on using SaaS to save money and accelerate innovation, without worrying about risks your users are taking with your budgets, your data and your customers.

ANGOKA
ANGOKA
angoka.io
ANGOKA is an IoT security company focused on protecting M2M communications for Smart Cities and Mobility. Headquartered in Belfast, with offices in London and The Hague, ANGOKA offers solutions that protect devices’ identities. With an increase of inherently insecure networks coming online with the boom of IoT, ANGOKA’s solutions safeguard critical machine-to-machine communication integrity and data provenance, creating trusted connections, even in untrustworthy networks.

Ansec
ansecia.com
ANSEC is a consultancy practice providing independent Information Assurance and Cyber Security focussed services to private & public sector customers throughout the UK, Ireland and internationally. Established in May 2007, the company specialises in Information Security, Programme and Project Management / Business Analysis, ICT Strategy, Architecture, IT Audit, Governance Risk & Compliance (GRC) and Digital Forensics. The ANSEC team can operate all levels within organisations, communicating effectively in both technical and business terms. Recent assignments include providing cyber security audits, ISO 27001 gap analysis, PCI DSS reviews, risk assessment, design and implementation of information security management frameworks certified to international standards.

Northern Ireland has become a global cyber security hub, boasting an impressive eco-system of specialist university research centres, home-grown innovators and international cyber security leaders.

Northern Ireland firms in the region deliver expertise globally on advanced persistent threats to national security, government, health, automotive, critical infrastructure, capital markets, legal, e-commerce, e-learning and child safety online.
Cynalytica

cynalytica.com

OT OptICS is the world’s first AI-driven OT cybersecurity platform, bringing unprecedented visibility and intrusion detection to legacy cyber-physical systems. Cynalytica’s unified platform can understand deviations in serial network behavior and automatically searches for anomalies — providing customers with an intelligent intrusion detection system and scalable tool that enables remote monitoring and analysis. Unlike other AI-driven OT cybersecurity platforms, it autonomously monitors level 0/1 serial communications that control industrial physical processes — giving it the unique ability to directly detect attacks.

LoughTec

loughtec.com

LoughTec specialises in protecting the world’s critical infrastructure with cyber security solutions, in sectors such as Finance, Government and Utilities. It utilises an innovative threat detection and prevention technology, ensuring customers are protected from both known and unknown threats, resulting in true zero-day prevention. LoughTec solutions include Cross Domain Solutions, File Upload Security, Malware Analysis, Email Security, Storage Security, Secure Device and Network Access, Secure calls, messaging, conference calling and video calling.

Salt Communications

saltcommunications.com

Salt Communications is a multi-award-winning cyber security company based in Belfast, Northern Ireland, that builds secure enterprise mobile communications solutions. Salt Communications’ high security system provides the same user experience as consumer apps but in a safe and protected manner, enabling the customer to have full, centralised control of the system at all times. Salt Communications offers the best armour organisations have to protect trade secrets and other sensitive, strategic and proprietary information when communicating on mobiles.

MetaCompliance

metacompliance.com

MetaCompliance is a leading cyber security and compliance specialist dedicated to helping organisations keep their staff safe online, secure their digital assets, and protect their corporate reputation. It has developed a world-leading SaaS solution to engage users, provide defence against cyber threats, and deliver regulatory reporting. Through its cloud-based platform, MetaCompliance provides customers with a fully integrated suite of security awareness training and compliance capabilities, including policy management, privacy, eLearning, simulated phishing, and risk management.

Skurio

skurio.com

Skurio is an innovative cyber security software company which helps customers protect themselves from digital risks. Its Digital Risk Protection platform combines automated, round the clock monitoring of the surface, deep and Dark Web with powerful analytics capabilities for cyber threat intelligence specific to an organisation. Additional features help protect data across the supply chain with synthetic identities, and protect the business from brand impersonation with typosquatting monitoring. Open APIs integrate valuable alerts into SOC and ITSM workflow systems to automate breach response.

Uleska

uleska.com

Uleska was founded in Belfast to address the inadequacies within software security and help businesses increase security coverage, with fewer resources and quicker than traditional security testing. Uleska has the world’s first extensible DevSecOps Orchestration platform, featuring an API-first approach that fits into existing DevOps processes. A single pane of glass for software security. The Uleska platform helps development teams scale their Application Security programs by automating and orchestrating their preferred security tools within CI/CD.

Vertical Structure

verticalstructure.com

Vertical Structure specialises in providing security and penetration testing services for web applications, cloud infrastructure and mobile applications. It conducts technical security training, and helps companies to achieve certification to international standards including ISO27001, Cyber Essentials and CAIQ and Amazon Web Services® Select Consulting Partner status. Its experts have more than 60 years of combined experience of technical skills and consulting in the information industry, traversing all sectors and disciplines. The team works in partnership with clients to identify, analyse and respond on schedule and within budget.

Invest Northern Ireland is the main economic development agency for Northern Ireland. It promotes inward investment and trade from its global network of offices.
