Supply Chain Checklist

Self Assessment checklist to support you with improvement opportunities

Businesses need to ask some critical questions of their supply chains and while some may seem obvious, getting clear answers can often prove challenging. Use this checklist to identify possible opportunities to improve your supply chain resilience.

Step 1

To identify the immediate risks to your supply chain and business, consider the following questions and answer either YES or NO. Where you have answered NO this might identify opportunities and potential actions you need to consider to protect your supply chain.

Risk Management:	YES	NO
Do you understand the implications to your business if one (or more) of your suppliers are unable to deliver product to you?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Do you know where your raw materials / parts / purchased products are coming from?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you mapped your supply chain (key suppliers) to identify the locations and movements of your procured goods / raw materials?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Do you know how your suppliers (and their suppliers) are being impacted by current global issues?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Do you know what the logistics route looks like for your supply chain?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have your significant suppliers undertaken a similar assessment of their supply chain?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you reviewed contracts with critical suppliers – liability (i.e. supply shortage / delivery), contingency, operational continuity clauses, duty cost and other taxation liabilities?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you considered how current global issues including Covid-19 and EU Exit will affect existing / future contracts – rebates, consignment stock, payment terms etc.?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Risk Mitigation:	YES	NO
Have you identified risk mitigation actions?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you identified contingency supply options (i.e. are there alternative suppliers and / or manufacturing facilities that could be called upon) and if so, do you know how quickly and at what cost?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you reviewed all your suppliers?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Are alternative transport / logistic routes available?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you a process to monitor future pandemic hotspots in your supply chain to mitigate future disruptions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you thought of business continuity / contingency plans if there is a future wave of a pandemic / a limited-warning notice of return to lockdown conditions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Step 2

To start thinking about actions that need to be addressed in preparation for recovery, consider the following questions and answer either YES or NO. Where you have answered NO this might identify opportunities and potential actions you need to consider to build resilience into your supply chain and conserving cash.

Inventory Management:	YES	NO
Have you contacted customers to establish future demand / requirements?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you identified existing inventory levels, particularly key inventory, components, parts etc.?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Do you know if you are carrying too much inventory?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Do you have a process in place to minimise the cost of carrying too much inventory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you identified components and raw materials that will have the highest impact on revenue / cash?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Do you effectively manage your inventory to prevent over-stocking / stock-outs?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you identified proactive actions to address potential / anticipated shortages?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Supply Chain Management:	YES	NO
Do you have contracts in place for key suppliers?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Do you have Key Performance Indicators (KPI's) and Service Level Agreements in place for your key suppliers?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you looked at opportunities to retender your purchases?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you implemented a structured cost reduction programme across purchased goods and services?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Do you understand the key costs in the business and which can be influenced? (i.e. bundle of communication services, service contracts, consumables, stationery, food etc.)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you reviewed how much you spend per supplier, rationalised your supply base?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you consolidated purchases to leverage additional cost reductions / supply?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Is there an opportunity to leverage collaborative buying power?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you looked at opportunities to collaborate with other businesses to reduce your distribution costs?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you looked at how you can forecast more effectively?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Do you have an adequate IT system and do you use it effectively?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you looked at opportunities where you could work with your customers to take cost out of the product / service?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Have you identified and evaluated re-shore or near-shore options to enhance your supply chain?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
